Cloud Solutions

Despite widespread adoption and the introduction of “cloud first” business strategies, many companies still struggle to gain full value from their cloud efforts.

Cloud-native systems are complex and distributed, and they require fundamentally different approaches to development. Organizations must have a clear view of the role they want cloud to play in their business. It requires defining the what and the why behind your investment in cloud and then executing on that vision.

Cloud Strategy

At Zeforge, our application modernization services help you achieve agility for an increasingly digital world. Integrate a combination of accelerators, platforms and strategic partners to modernize core business applications

We are preferred (Tier 1) staffing partners to world's largest consulting firms and Fortune 500 clients.

Zeforge supports workforce diversity and does not discriminate people based on their religion, ethnicity, race, color, and age.

Why Use Zeforge Solutions?

We have a proven track record in delivering solutions to complex Information Technology problems.

Our clients to date have ranged from large enterprises to SME's across a variety of industry sectors.

At Zeforge Solutions we feel it is important to build a close working relationship with clients.

We believe concurrency of knowledge, skills and personnel throughout a project are key.

Post implementation we can offer full support and training services.

We reduce the risks associated with IT projects and allow you to implement business systems that will quickly provide a return on investment.

Zeforge Hiring Process

Zeforge is different from other vendors when it comes to Recruiting and Technical Screening, Zeforge Follows a Simple 5-Step Screening Process:

- Skills Testing
- Resume Check
- Online Research
- Assessment Test
- Technical Screening Videp Interview

Zeforge hiring is no longer relies on resumes or assumptions. By standardizing the interview process at scale with detailed Resume screening with Customer requirements, Online research, and professional references and following Analytical and Coding assessments, Followed by Technical Video interview screening.

Skills Testing and Resume screening are the process of determining whether a candidate is qualified for a role based on his or her education, experience, and other information captured on their resume.

Online Research is from identifying consultant job history, skill endorsements, certifications, and other technical recommendations.

Aptitude tests are tests designed to assess a virtually infinite variety of abilities – ranging from basic math to computer programming. Aptitude tests form a sort of automated screening method which allows Nuebotics to narrow down the candidate pool quickly and efficiently. Usually, around 80% of the lowest-scoring candidates will be eliminated at this stage.

Technical screening is designed and conducted by a technical expert who performs a technical interview to identify consultant skills that match the Customer's requirements and the consultant has enough technical skills to perform the Customer assignments. During this process screening team verifies the consultant's identity.

Zeforge has registered a 96% Success rate in hiring the right consultants and providing great services to customers.

What We Offer

To ensure the success of projects we feel it is necessary to develop a good working relationship with clients. From project inception through to the final delivery of the project, you will deal with the same key professionals.

If the project requires specialist third party involvement, we will undertake all liaisons on your behalf. Our key technology partnerships allow us to recommend specialists as required .

We will always offer impartial vendor independent advice and will strive to offer a number of alternative solutions to your requirements.

Partnerships

Our expertise is backed up with strong partnerships with leading software and service companies.

Zeforge Solution's partners play an important role in ensuring that we can deliver a full range of professional services to our clients. We work closely with Microsoft, Siebel, SAP, Hyperion, IBM.
